

Python Backend Developer 10-Day Plan (17th to 26th April)

Time per day: 2 hours

Goal: Understand Flask, Django, and FastAPI enough to build projects and get job-ready.

Date	Tech Stack	Topics to Cover	Status
Apr 17	Flask	Flask basics: App setup, routing, templates (Jinja2), static files	
Apr 18	Flask	Forms, request/response, sessions, simple CRUD using in-memory list/dict	
Apr 19	Flask	Flask with SQLite, SQLAlchemy ORM, basic validation	
Apr 20	Flask	Build a mini portfolio site and deploy using Render/Vercel	
Apr 21	Django	Django setup, project vs app, admin panel, models, migrations	
Apr 22	Django	Views, templates, URL routing, CRUD operations with Django ORM	
Apr 23	Django	Authentication, middleware, forms, messages, static/media files	
Apr 24	Django	Build a mini blog or task manager project	
Apr 25	FastAPI	FastAPI basics: routes, path/query params, Pydantic models	
Apr 26	FastAPI	CRUD with SQLite/PostgreSQL, async/await, building a simple REST API
